

Background and Purpose

The purpose of this Change Request is to modify the scope, price and schedule for Contract # ITS07 2002-026 to modify the functionality required and to modify the schedule due to changes in functionality and delays.

Scope

The following software functionality will be added to the MAAP application under this contact extension:

1. Municipal Agents Change of Tender Type
2. Lease Transfer for Municipal Agents
3. Use of Separate ID and Password for MAAP
4. Registration Duplicate Reprints
5. Offline Processing of MAAP Transactions
6. Municipal Agent Supervisory Override Privilege
7. Permit Audit Number
8. Ability to switch to New/Renewal/Transfer Registration from New CTA
9. Town Clerk Only Title Application
10. Fleet Registration
11. Deleting a Dummy CTA
12. Additional Town Fee Calculations
13. Ability to Generate a new CTA Number for the Original Title Application
14. Surviving Spouse Transfer
15. Development and Documentation of the XML Response schemas

See Appendix 1 for a brief description of these functions with related assumptions.

This functionality will be developed and provided as integrated features of the current MAAP application under development.

In addition BearingPoint will provide 40 hours of support services for installation of Oracle RAC software in support of set-up of the Testing and Production environments.

The following items will be removed from the MAAP application under this contact extension:

1. All functionality and reporting related to Boat Registrations
2. All functionality and reporting related to Special Registrations
3. All functionality and reporting related to Legislative Plates

No future development, reporting, testing, training, documentation or warranty support will be delivered for the above 3 items. However, a consultant will be assigned to assist the DOS IT team with the development of the Boats functionality, spending 10 hours a week on this task until the end of the warranty period. The consultant will provide assistance related to the design and development of this functionality, but will not be responsible for any specific deliverables. The scope of this statement of work does not include any integration of the Boats functionality into the MAAP application.
